We're doing...

The security of the building isn't very good.

We want you to feel secure in your home. We've put in new cameras and we're changing all door fobs for residents. This is so only Moorcot Court residents can get into the building.

The main doors are often unlocked so anyone can walk in.

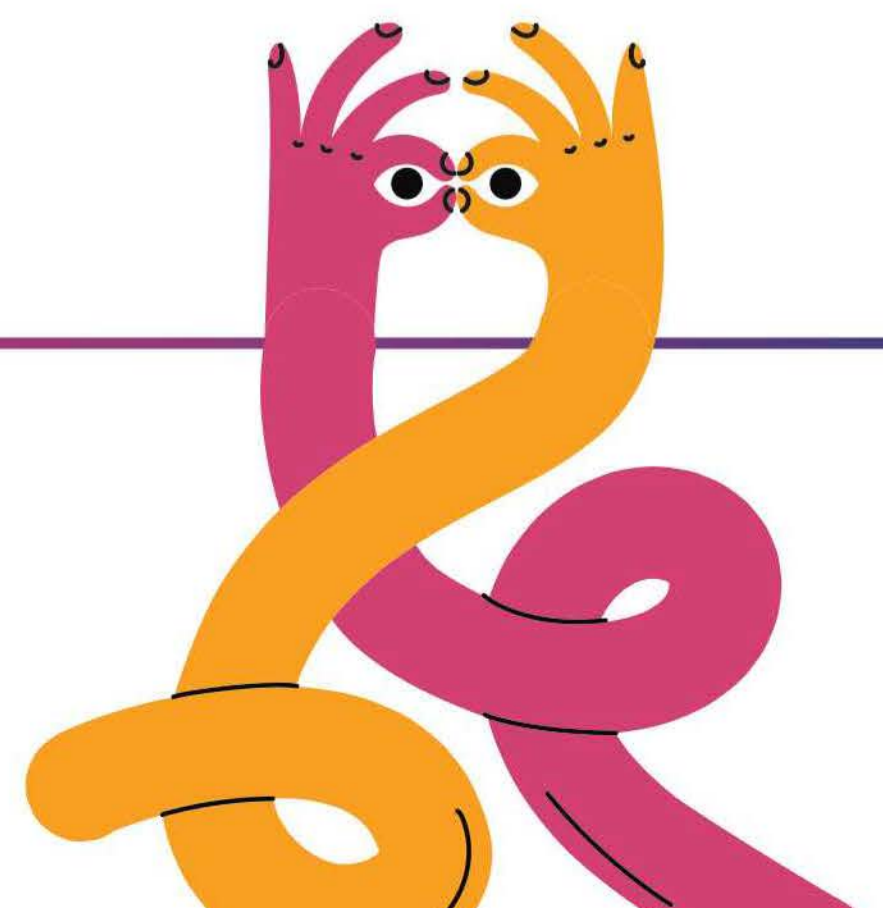

We're replacing door fobs but we also need your help. **Please don't break the emergency door release glass to open the door.** Ask your visitors to only use the green door release button when they leave.

There are problems in the area with young people and anti-social behaviour.

We want you to feel safe in your neighbourhood. We've spoken to the young people, and their families about their behaviour.

People are sitting on the wooden planters in front of the building causing problems.

The building is untidy.

The garden is untidy and full of rubbish.

We're doing...

We want you to feel comfortable in and around your home. We've taken away the wooden planters, and we're working with you to make the garden areas nicer.

We want the building to be nicer for you. We do a full clean once a week and visit twice daily to check bins and chutes. We're also going to repaint and deep clean the communal areas.

We want the garden areas to be places you enjoy. Our work in the garden areas includes cutting the grass and the hedges. We don't litter pick, but we've arranged a special litter pick and skip day. We're also working with you to help you if you want to get more involved.
